## **DETAILED ACTION**

### ***Election/Restriction***

1. Applicant's election without traverse of claims 1 and 2, Group I in Paper No. 12, filed February 10, 2003 is acknowledged.

### ***Status of the Claims***

2. Claims 1 and 2 are pending. Claim 2 is amended in Paper No. 12, filed February 10, 2003. Claims 3-25 are cancelled in Paper No. 12.

### ***Specification***

3. This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 for the reason(s) set forth on the attached Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures. Applicant must comply with the sequence rules, 37 CFR 1.821 - 1.825. Failure to comply with these requirements will result in ABANDONMENT of the application under 37 CFR 1.821(g). Extensions of time may be obtained by filing a petition accompanied by the extension fee under

Art Unit: 1636

the provisions of 37 CFR 1.136(a). Direct the reply to the undersigned. Applicant is requested to return a copy of the attached Notice to Comply with the reply.

There are 6 sequences listed in Figure 2, but the description lists 5 SEQ ID NO:'s.

Therefore, one of the sequences of Figure 2 is not identified by a sequence identifier.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

5. Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by US 6,156,876 (Beach).

Beach teaches an isolated nucleic acid sequence at figure 8 and figure 11 which is identified as the promoter region of cyclin D1. The promoter region of Beach contains the instant SEQ ID NO:5. The instant specification at page 19, lines 12-16 and at example 1, teaches

Art Unit: 1636

that this region is known to regulate expression in response to the protein "CRE". Therefore, the teachings of Beach anticipate the subject matter of instant claims 1 and 2.
